

UAE construction machinery sector set for more growth

Staff Report

DUBAI — The UAE construction machinery industry in the UAE will continue to grow, a recent market research has revealed, and will be the centre of focus at the 12th Hardware+Tools Middle East, the region's most comprehensive and significantly the most representative trade event for the hardware, tools and machinery industries

The event will be held at the Dubai International Convention and Exhibition Centre from May 10 to 12.

The event, organised by trade fair and conference organiser Epoc Messe Frankfurt, has been reflecting the latest trends and developments in the hardware, tools and machinery market for over a decade and it continues to offer key influencers, buyers and decision makers in the region an ideal platform to assess and evaluate the products and services they need.

"Hardware+Tools Middle East has continued to evolve in order to keep pace with the fluid regional market. We expect the addition of the Middle East Construction Forum which we are organising in collaboration with the Soci-

ety of Engineers to be a great value add to the overall event," said Epoc Messe Frankfurt CEO Ahmed Pauwels.

"This is the 12th edition of the trade fair which each year features the latest product ranges and health and safety equipment as well as new developments in the construction industry, the latest lines of eco-friendly construction material and energy-saving hardware and tools. The event's significance to key industries in the region is reflected in the wide support and participation it attracts year on year," Pauwels stated.

Representative trade events such as Hardware+Tools Middle East are vital for the progress and development of the local market. By attracting leading manufacturers and distributors to Dubai, it raises the profile of the specific sector and plays an important role in raising local standards to the highest levels.

Organisers anticipate a favourable reception from the industry for the event which will bring together construction professionals, buyers, suppliers, manufacturers and key purchase influencers under one roof. The exhibition will cover machinery, tools, construction and building materials and hardware.
